On our way to a  
**Happy Halloween**

To assemble the calendar: Use an exacto knife to cut along the 31 lines on the big pumpkin. Cut out the Niddles' paper strips along their solid lines. Fold each strip along the dotted line under the number and slip it through one of the cuts you made on the pumpkin. For a neater calendar, take a blank page and glue or tape its edges to the back edges of the pumpkin page. To use the calendar: Each day, pull out one strip (you can go by the date, or by how many days are left). Fold along the dotted lines. You can either fold the short pieces outward and put a dot of glue between the front and back Niddles, or fold the short pieces inward (so you have a triangular shape) and put a dot of glue on the number, folding the blank side over it.
